1 Introduction

Khmer Standardization (Unicode Conversion) is an application generated specifically for converting non-Unicode font based on Office document into Unicode font. This document explains how to use the software.

2 Running the Application

After the successful installation of software and all its dependencies, the application can be started in two different ways:

1. In program menu startup (Figure 1).
2. The “Convert to Unicode” button embedded to each Microsoft Office application. (Figure 2)

3 Using Application

1. Convert Office document

After running the application:

1. Click "Browse" to browse to the document to convert.
2. Click "Save as" to select the destination Unicode file, if you don't want to use the default Unicode file name and path
3. Click on "Convert to Unicode" button to convert the document
4. After the conversion, there is a message "conversion complete". Click ok then the converted file is loaded.
