User must have Administrator privileges to install the Sinhala Unicode Converter utility.

_

^{*} User can install this software from JRE\SETUP folder. Please refer the installation instruction given in Readme.txt included in the same folder.

3 Installation of Sinhala Unicode Converter 2.0

Please follow the steps given below to install Sinhala Unicode Converter 2.0 software:

- 1. Run setup.exe placed in CONVERTER\setup by double clicking it.
- 2. After initialization, the installer program will show "**Welcome**" window on start up as shown in Figure 3.1.

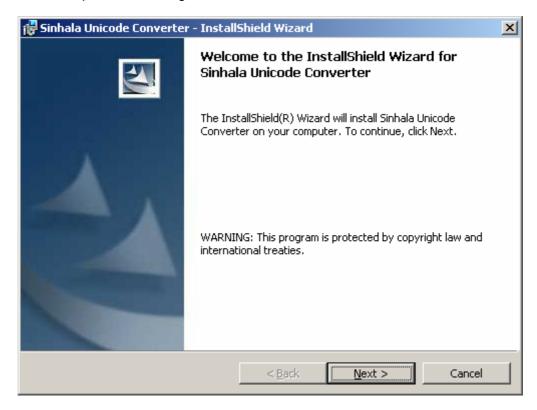

Figure 3.1: Welcome window

3. Click "Next" button. A new window "Destination Folder" will appear as shown in Figure 3.2. The default destination folder is. "C:\Program files\Unicode Converter\". It can be changed by clicking the "Change" button. If user does not want to change the destination folder, he can directly go to step number 6.

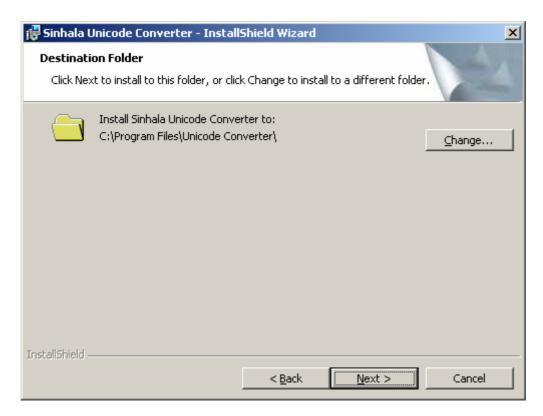

Figure 3.2: Destination Folder window

4. If "Change" button is clicked, a new window "Change Current Destination Folder" will pop-up. On this window a user can write the destination folder path in the "Folder name" text box or alternatively select the destination path through the drop down folder browser menu. In case, user installing the program selects a destination folder that does not exist, the setup program will create a destination folder by the name specified in the given path. The newly created folders are denoted by special new folder icon. () The user also can specify new folders to be created by clicking on "New folder" button next to the "Up one level" folder browser button. Please refer Figure 3.3.

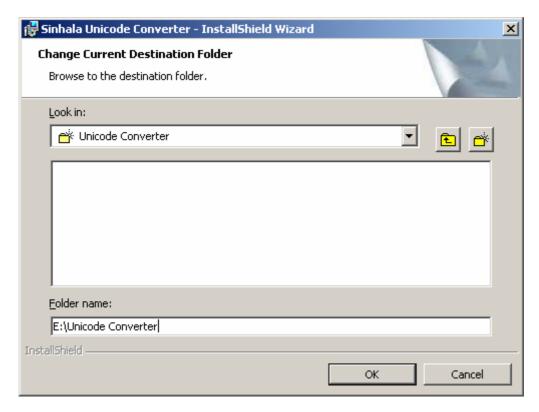

Figure 3.3: Change Current Destination Folder window

5. Click "Ok". User can now verify that the path of destination directory has been changed to one that user himself described. Refer Figure 3.4:

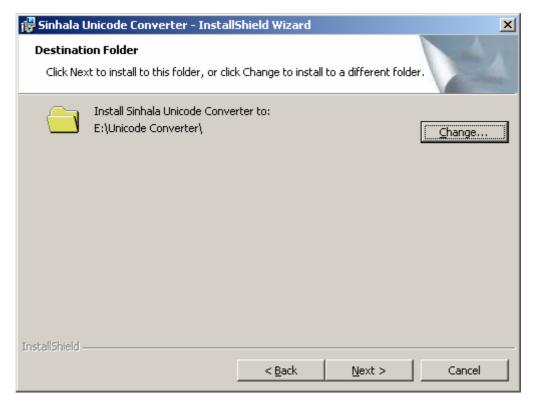

Figure 3.4: Destination Folder window

- 6. Click Next.
- 7. The installer will display dialogue "Ready to Install the Program", reviewing the installation settings. The installer automatically collects information about the user and company from the system. Refer Figure 3.5

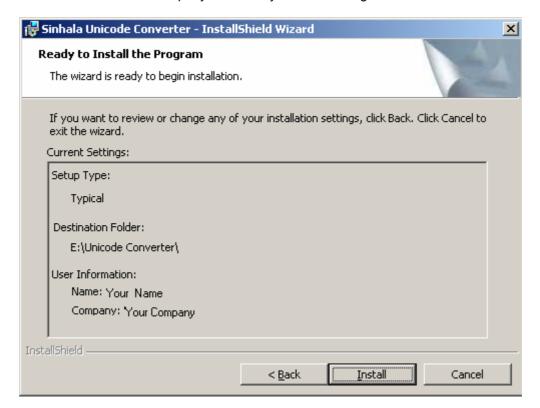

Figure 3.5: Ready to Install the Program window

- 8. Click "Install".
- 9. Installer will create directories and start copying the programs files to the destination directory. Progress bar will show the percentage completion of installation process as shown in Figure 3.6.

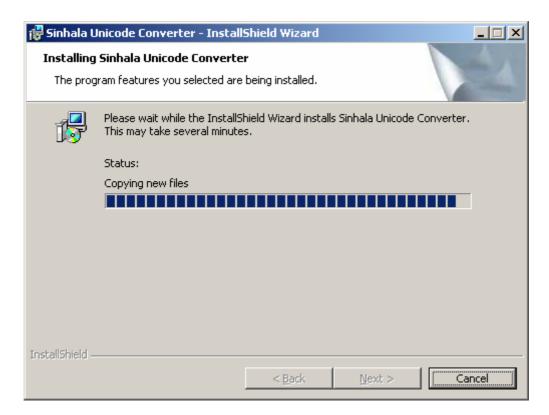

Figure 3.6: Installation in progress

10. After a successful installation, the Sinhala Unicode Converter installer will show a success message. The user can launch the software by checking "Launch the program" check box. Click Finish to complete the setup. Please refer Figure 3.7.

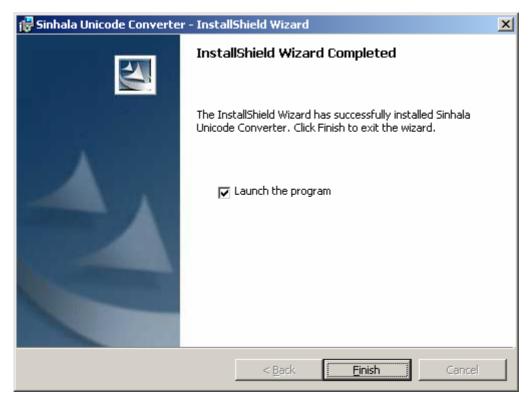

Figure 3.7: Setup complete
